

Biography: BG is an academic general practitioner and health services researcher with an interest in quality and safety of healthcare, particularly in relation to prescribing safety and multimorbidity. His research spans the spectrum from epidemiology, through the development and evaluation of complex interventions, to applied work with health services to implement improvement. He has served on a number of national committees, including the Scottish Government Polypharmacy Group and chairing the guideline development group of the UK National Institute for Health and Care Excellent Multimorbidity Guideline.
